

COM5508: MEDIA DATA ANALYTICS

Effective Term

Semester A 2025/26

Part I Course Overview

Course Title

Media Data Analytics

Subject Code

COM - Media and Communication

Course Number

5508

Academic Unit

Media and Communication (COM)

College/School

College of Liberal Arts and Social Sciences (CH)

Course Duration

One Semester

Credit Units

3

Level

P5, P6 - Postgraduate Degree

Medium of Instruction

English

Medium of Assessment

English

Prerequisites

Nil

Precursors

Nil

Equivalent Courses

Nil

Exclusive Courses

Nil

Part II Course Details

Abstract

The course trains students of communication and new media to analyze and visualize numeric, text, and visual data from social media using computational social science methods, tools, and algorithms. Special emphasis will be placed

on building, validating, and applying predictive models for user behaviour on social media. Through interactive learning sessions including hands-on tutorials, individual exercises, group-based projects, etc., the students are expected to become proficient to select the appropriate and efficient methods to explore, analyse, validate, and visualize big data from social media for a variety of basic and applied research purposes such as theory-driven studies, data-driven reporting, news visualization, social media user recommender systems, and etc. Issues of policy and research ethics such as privacy protection, data integrity, and open access will also be explored along with technical challenges and solutions.

Course Intended Learning Outcomes (CILOs)

CILOs	Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Understand the principles and procedure of analyzing and visualizing social media data.			x
2	Explain the basic methodologies and techniques of data analytics, to recognize the strengths and weaknesses of different computational approaches to social media analytics.		x	
3	Interpret numerical, textual, and visual data to systematically assess the characteristics and patterns of user generated content and behaviour on social media.	x	x	
4	Value ethical and socially responsible actions in data analysis and visualization.	x		
5	Be critical when planning and implementing plans for studying social media content.	x	x	x

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Learning and Teaching Activities (LTAs)

LTAs		Brief Description	CILO No.	Hours/week (if applicable)
1	Lectures and tutorials	Engage in formal lectures to gain knowledge about key concepts, such as procedure and methods for data exploration, analysis and visualization.	1, 2, 3, 4, 5	3 hours/week
2	Individual exercises	Individually develop and test customized algorithms to analyse and visualize social media data.	1, 2, 3, 4, 5	2 hours/week for 8 weeks

3	Group projects	Students will work in teams to explore, analyse, and visualize social media data and present their findings in data product and an oral presentation.	1, 2, 3, 4, 5	3 hours/week for 5 weeks
---	----------------	---	---------------	--------------------------

Additional Information for LTAs

Lectures and tutorials - CILO 2*,3*,5*

Individual exercises - CILO 1*,4*

Group projects - CILO 3*

* indirectly

Assessment Tasks / Activities (ATs)

	ATs	CILO No.	Weighting (%)	Remarks ("- " for nil entry)	Allow Use of GenAI?
1	Class participation and tutorial tasks	1, 3, 4	30	-	Yes
2	Individual exercises	2, 3, 5	40	-	Yes
3	Group project and presentation	1, 2, 4, 5	30	Integrate GenAI tools into projects can help students brainstorm ideas, draft sections of their work, learn new technologies, and analyse data.	Yes

Continuous Assessment (%)

100

Examination (%)

0

Assessment Rubrics (AR)**Assessment Task**

Class participation and tutorial tasks (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

Criterion

Ability to replicate the procedure and methods of social media data analysis and visualization based on given examples

Excellent

(A+, A, A-) High

Good

(B+, B, B-) Significant

Fair

(C+, C, C-) Moderate

Marginal

(D) Basic

Failure

(F) Not even reaching marginal levels

Assessment Task

Individual exercises (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

Criterion

Capacity for self-directed learning to understand the procedure and methods of social media data analytics

Excellent

(A+, A, A-) High

Good

(B+, B, B-) Significant

Fair

(C+, C, C-) Moderate

Marginal

(D) Basic

Failure

(F) Not even reaching marginal levels

Assessment Task

Group project and presentation (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

Criterion

Ability to demonstrate and explain with technical details, accuracy and clarity, the process and results of analyzing and visualizing social media data

Excellent

(A+, A, A-) High

Good

(B+, B, B-) Significant

Fair

(C+, C, C-) Moderate

Marginal

(D) Basic

Failure

(F) Not even reaching marginal levels

Assessment Task

Class participation and tutorial tasks (for students admitted from Semester A 2022/23 to Summer Term 2024)

Criterion

Ability to replicate the procedure and methods of social media data analysis and visualization based on given examples

Excellent

(A+, A, A-) Actively participate in the lecture sessions, and fully complete all the tutorial tasks

Good

(B+, B) Attend the lecture sessions, and complete the basic tutorial tasks

Marginal

(B-, C+, C) Attend most of the lecture sessions, and complete most of the tutorial tasks

Failure

(F) Do not attend the lecture sessions, or do not hand in tutorial tasks

Assessment Task

Individual exercises (for students admitted from Semester A 2022/23 to Summer Term 2024)

Criterion

Capacity for self-directed learning to understand the procedure and methods of social media data analytics

Excellent

(A+, A, A-) Actively seeking knowledge outside class

Good

(B+, B) Able to look for online information

Marginal

(B-, C+, C) Able to learn from others

Failure

(F) Fail to learn independently

Assessment Task

Group project and presentation (for students admitted from Semester A 2022/23 to Summer Term 2024)

Criterion

Ability to demonstrate and explain with technical details, accuracy and clarity, the process and results of analyzing and visualizing social media data

Excellent

(A+, A, A-) Demonstrate creativity in applying knowledge learnt in class and outside class in the project

Good

(B+, B) Able to apply knowledge learnt in the class to the project

Marginal

(B-, C+, C) Able to deliver a project with some technical elements

Failure

(F) Fail to use the knowledge taught in the course in the project

Part III Other Information

Keyword Syllabus

Computational social science, web analytics, data mining, machine learning, supervised learning, unsupervised learning, prediction, classification, clustering, recommender systems, data visualization, data dashboard
