

EE6691: APPLIED RESEARCH INTERNSHIP SCHEME IN ELECTRICAL ENGINEERING

Effective Term

Semester A 2026/27

Part I Course Overview

Course Title

Applied Research Internship Scheme in Electrical Engineering

Subject Code

EE - Electrical Engineering

Course Number

6691

Academic Unit

Electrical Engineering (EE)

College/School

College of Engineering (EG)

Course Duration

Non-standard Duration

Other Course Duration

For full-time mode student only: 2 semesters/terms with possibility to extend for 1 more semester/term, (As set out in City University's Academic Regulations, Dissertation-type courses are not allowed to be repeated.)

Credit Units

0-15

Level

P5, P6 - Postgraduate Degree

Medium of Instruction

English

Medium of Assessment

English

Prerequisites

Nil

Precursors

30 Credit Units of MSc elective courses; or equivalent

Equivalent Courses

Nil

Exclusive Courses

EE6680 Dissertation, EE6680D Dissertation, EE6690 Internship Scheme in Electrical Industry

Additional Information

Note 1: Medium of daily interaction with research staff in the placement establishment is depending on the country of placement, however, English is the medium for assessments for both written and oral forms.

Part II Course Details

Abstract

The aim of the internship is to provide students with an opportunity to integrate and apply what has been learnt in the taught postgraduate, with experience through an applied research project in a research environment.

Course Intended Learning Outcomes (CILOs)

CILOs		Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Organize and manage a substantial individual industrial project in Design, Applied Research, or Development, demonstrating effective project management skills.		x	x	
2	Work independently with professionalism, successfully completing project assignments while adhering to industry standards and practices.		x	x	
3	Exhibit initiative, innovation, and intellectual abilities in addressing and solving technically challenging projects/assignments, showcasing creative problem-solving skills.		x	x	x
4	Effectively disseminate research findings through written technical research reports, peer-reviewed publications, and oral presentations, demonstrating clear communication and dissemination skills.		x	x	x

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Learning and Teaching Activities (LTAs)

LTAs		Brief Description	CILO No.	Hours/week (if applicable)
1	Daily interaction and communication with staff in the designated establishment	Students engage in ongoing meetings and project discussions with company mentors throughout the project cycle, promoting continuous feedback, professional collaboration, and active learning.	1, 2, 3	
2	Keep a training log and perform daily research activities	Students maintain a reflective training log to document daily research activities, including project documentation, technical paper reading, laboratory experiments, implementation, and result evaluation, fostering self-reflection and critical analysis of the research process.	1, 2, 3, 4	
3	Supervisory visits/discussions	CityU supervisors conduct regular visits and discussions with students to review research progress, provide guidance, and ensure alignment with learning goals, facilitating continuous support and mentorship.	1, 2, 3	
4	Write a report and give a presentation	Students summarize their research outcomes through a comprehensive written report and an oral presentation, effectively communicating their findings and fostering discussions with supervisors and peers, enhancing dissemination and public speaking skills.	1, 2, 3, 4	

Assessment Tasks / Activities (ATs)

ATs		CILO No.	Weighting (%)	Remarks ("- " for nil entry)	Allow Use of GenAI?
1	Log book, technical research report, published peer review paper (if any), project demonstration, final oral presentation	1, 2, 3, 4	100	-	Yes

Continuous Assessment (%)

100

Additional Information for ATs

Continuous Assessment: Coursework (100%)

The course work assessment is divided into two major components:

Internship Component (40%)

The assessment for the internship placement component is composed of log book, discussions/visits to obtain feedback from training establishment, presentation and demonstration in the training establishment.

Research Component (60%)

The assessment of research component is composed of technical research reports, published peer reviewed papers (if any), project demonstration, and final oral presentation. The assessment of the project will be based upon the following components:

- (i) quality and content of research reports/papers
- (ii) performance in oral presentation

The assessment process will take the form of a technical report and an oral presentation together with a project demonstration, and will be carried out by an assessment panel appointed by Head of Department and comprised of a chairman, an assessor and the project supervisor. The Chairman will moderate the assessment process while the assessment panel will generate a single assessment mark for each project. In the event of a disagreement between supervisor and assessor on the assessment mark, the chairman shall arbitrate.

Note 2: The internship placement can be either in local and overseas establishments, preferably in industrial companies or research-based laboratories attached to universities. Screening of the internship places similar to other internship schemes in the EE department will be performed in order to select qualified hosts. Each internship must have a well-defined project and schedule for the student. There are well established monitoring procedures to ensure the quality of internship. Company visits/interviews and log book checking are some of those procedures.

Assessment Rubrics (AR)**Assessment Task**

Coursework (for students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter)

Criterion

Achievements in CILOs

Excellent

(A+, A, A-) High

Good

(B+, B, B-) Significant

Fair

(C+, C, C-) Moderate

Marginal

(D) Basic

Failure

(F) Not even reaching marginal level

Assessment Task

Coursework (for students admitted from Semester A 2022/23 to Summer Term 2024)

Criterion

Achievements in CILOs

Excellent

(A+, A, A-) High

Good

(B+, B) Medium

Marginal

(B-, C+, C) Low

Failure

(F) Not even reaching marginal level

Additional Information for AR**Constructive Alignment with Programme Outcomes**

PILO 1, 2, 3, 4, 5 The course provides students with ample opportunities in acquiring knowledge and know how in advanced technologies in the chosen areas of applied research internship.

PILO 6, 7 Students are required to complete a technical report, and demonstrate and present their research contribution in the selected topics. Students will also acquire project management skills and develop a sense of financial viability for the applied research project.

PILO 8 Students are required to complete an industrial research project which enables them to develop the ability to do academic/industrial research

Part III Other Information**Keyword Syllabus**

Nil

Reading List**Compulsory Readings**

Title	
1	Designated research/topical papers in the field of the project

Additional Readings

Title	
1	Designated research/topical papers in the field of the project
