Part II Course Details

Abstract

This course aims at helping students to identify key issues in language testing and evaluation. Students will learn to describe basic test statistics and analyse the characteristics of good language assessments. They will apply this knowledge to the construction, revision, and administration of valid and reliable language assessments.

Course Intended Learning Outcomes (CILOs)

CILOs		Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Designing standard procedures in assessment, and applying this knowledge of standard procedures to the construction, revision and administration of assessments	20	x	x	x
2	Critiquing and selecting appropriate assessment tools to assess different language skills	30	x	x	x
3	Analysing the validity, reliability and washback effect of a language test/method of assessment	30	x	x	x
4	Analysing and interpreting test scores	20	x	x	x

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Learning and Teaching Activities (LTAs)

LTAs		Brief Description	CILO No.	Hours/week (if applicable)
1	1	Reading the course book and recommended readings Students will complete the reading assignments related to language testing.	1, 2, 3, 4	5 hours / week over 13 weeks

2	2	Interactive lecture and student in-class activities Students will learn key concepts related to language testing and evaluation during the lectures. Students will also analyse different assessments by applying the key concepts in language assessment and relate the concepts to actual test/assessment constructions and administrations that they are familiar with.	1, 2, 3, 4	2.5 hours / week over 11 weeks
3	3	Online discussion Students will conduct online discussion related to language testing. The discussion allows students to share their own language testing and assessment practice and viewpoints on the issues with their classmates. They can practise applying, analysing, interpreting and evaluating concepts covered in the course.	1, 2, 3, 4	0.5 hr/week over 11 weeks
4	4	Conferencing Students will participate in individual/small group consultations which they will receive feedback on their application of the concepts to students' own test development.	1, 2, 3, 4	45 mins in 2 meetings

Assessment Tasks / Activities (ATs)

	ATs	CILO No.	Weighting (%)	Remarks (e.g. Parameter for GenAI use)
1	Online discussion posting Questions/issues related to language testing and evaluation will be posted on the online discussion board to help students identify, describe and apply the concepts covered in the course. Students are encouraged to do continuous revision throughout the course and to read and comment on their classmates' questions and viewpoints.	1, 2, 3, 4	10	(Individual work; to be assessed individually) Marking breakdown and CILOs - Online discussion posting: Applying concepts covered in the course accurately throughout the course (CILOs 1-4)-10%

2	Individual Assignment One individual assignment will be given to students to help them apply concepts covered in the course to the development and revision of an assessment. To complete the assignment, students need to follow two key steps that a classroom test/assessment developer needs to go through before re-administering a test/method of assessment to another group of students. In following both steps, students need to apply concepts learnt in the course to generate their own assessment. Step 1 – Critique an existing test / assessment & suggest how it can be improved. Step 2 – Revise/Construct the test / assessment & pilot it. At the end of the two steps, students need to submit a 15-page report describing, explaining and evaluating the processes taken to revise and develop the test/assessment. In Step 1, students need to apply concepts learnt in the first few lessons of the course to evaluate the test/assessment they have chosen. After completing Step 1, students need to submit their comments briefly in bullet points. In Step 2, students need to implement the revision plan they have suggested in Step 1, interpret and analyse the pilot findings and evaluate the final test/assessment using all concepts learnt in the course. After completing Step 2, students need to	1, 2, 3, 4	90	(Individual work; to be assessed individually) Marking breakdown and CILOs - Individual assignment: - Constructing and administering assessments following standard development procedures (CILO 1)-18% - Choosing appropriate assessment tools to assess different language skills (CILO 2)-15% - Evaluating the validity of a test (CILO 3)-10% - Evaluating the reliability of a test (CILO 3)-10% - Evaluating the test scores of a test (CILO 4)-18% - Evaluating the washback effect of a test (CILO 3)-7% - Revising a test effectively(CILO 2)-12%
