Part II Course Details**Abstract**

The MBA Enterprise Diagnostic Residential Trip is an action learning course that provides an excellent opportunity for students to think creatively and work in multi-disciplinary groups when time and resources are limited under a new and ambiguous environment outside Hong Kong. MBA students will be grouped into several teams with varied levels of required skills and experience. Each team will analyze a real business problem facing with the host company and develop an action plan for the consideration of the company. Under the guidance of the assigned supervisors, MBA participants are expected to apply appropriate theories and use appropriate research methodologies, such as interview and questionnaire survey with relevant parties (e.g., managers, frontline staff, vendors of the host organization, and even customers), analyze the problems, develop alternative solutions, and produce presentation and written report for the host organization. It provides participants the opportunity to explore and master their business knowledge from the hands on experiences.

Part III Other Information

Keyword Syllabus

This course will take the form of a field study of approximately 10 days outside Hong Kong. Potential companies will be approached regarding any problems they have relating to management operation and strategy. From the problem situations presented, a field study will be identified, and students will work on it in small groups. Before the field study itself is undertaken, students will have to clarify exactly what the client's requirements are. They will first do any appropriate research that it is possible to do from Hong Kong and plan thoroughly how they will carry out the field study during the period outside Hong Kong. They will then undertake the visit, accompanied by R-trip supervisors.
