Part II Course Details

Abstract

FinTech industry is a new fundamental revolution formed in the financial environments. It has significant impacts to the traditional revenue structure of financial institutions. The course gives students a unique opportunity to learn the latest

developments faced by FinTech market. The course will be taught from a view of FinTech trends and applications, e.g. on-line payments, AI technology innovations, and the operational solutions for KYC/AML/Compliance issues. Analysis methods using Python and AI technology will be demoed and used to show the applications. In addition, the course will get in touch with how to run a start-up company in FinTech industry and the VC funding support. The course will arrange two company visits and a series of speeches with the industry experts who will engage in interactive discussions of current issues in their area of expertise. On completion, students will have a rounded knowledge and appreciation of the key issues that the FinTech industry faces.
