

# URINARY TRACT DISEASES

College of Veterinary Medicine and Life Sciences  
in collaboration with Cornell University

## Approach to cats with lower urinary tract diseases

Lower urinary tract clinical signs are very common in cats. These clinical signs are associated with a number of underlying conditions, such as idiopathic cystitis and uroliths. Successful management of these cases requires a logical approach to diagnosis so that the correct disease process will be identified.

**Date:** 20 July 2018 (Friday)  
**Time:** 8:00 pm to 10:00 pm (Light dinner available at 7pm)
