

City University of Hong Kong - School of Veterinary Medicine

in collaboration with Cornell University

A Lecture organised by The School of Veterinary Medicine

The Economics of Transboundary Disease Control:

Case Studies of FMD Planning in the United States and New Zealand

Speaker: Professor Tim Carpenter MS, MS, PhD

Date: 31 August 2015 (Monday)

Time: 2:30 pm to 3:30 pm

Venue: B5-308, Blue Zone, Academic 1,

City University of Hong Kong

Tim Carpenter, Professor of Veterinary Epidemiology and Economics at Massey University (New Zealand), Gilruth Chair of Animal Health and Director of the EpiCentre, has had a career spanning more than 3 decades.

Tim's research interests are focused on a vast array of methodologies developed to investigate the epidemiology and economics of disease in a variety of animal species. Tim has worked with aquatic, wildlife, companion animals and livestock in the field of bacterial, viral and protozoan infections and non-infectious diseases, ranging from African Swine Fever and West Nile Disease to ligamentous injuries in horses. Beneficiaries of his work include various agencies, including the US Department of Homeland Security (DHS), the Inter-American Development Bank (IDB), the World Health Organization (OIE), the Food and Agriculture Organization (FAO), several State and Federal Departments of Animal Health, including the US Department of Animal Health (USDA), the US Department of the Interior (USDI), and decision and policy makers around the world, including more than 25 countries from Argentina to Vietnam.

Tim has mentored more than 80 MS, MVPM and PhD students and postdoctoral fellows, many of whom have gone on to leadership roles in academia, government and industry worldwide. Tim also supervises postgraduate education in Epidemiology and a One Health program, which has graduated its first class of approximately 90 veterinary and medical practitioners in seven South Asia countries, and Mongolia and China.
