And be among the first students in Hong Kong to graduate in this exciting field.

Intelligent Manufacturing Engineering

Department of Systems Engineering
College of Engineering
City University of Hong Kong

JUPAS Code: JS1216
The Intelligent Manufacturing Engineering programme

CityU offers a signature undergraduate programme aimed at developing young talents for “Industry 4.0” and “smart manufacturing”. This is in line with the Hong Kong Government’s push for re-industrialization, with the goal to develop “high-end manufacturing based on new technologies and intelligent production”.

Knowledge and Skills in

- Engineering sciences
- Engineering innovations
- Automation
- Data Analytics

What is and Why Intelligent Manufacturing Engineering?

- The “Industry 4.0” initiative, introduced by the German Government in the 2010’s, promotes intelligent manufacturing through the integration of a software-intensive manufacturing system, big data and the Internet of Things, to form intelligent and highly efficient production networks.
- In the “Hong Kong 2030+: A Smart, Green and Resilient City Strategy” published by the HK Government, intelligent production and Industry 4.0 are identified as a key component for Hong Kong’s future planning and growth.
- “Made in China 2025”, issued in 2015, is a key national strategic plan to further develop the manufacturing sector of Mainland China.

What does our Intelligent Manufacturing Engineering programme offer?

- This major aims to develop the abilities of our students in engineering sciences, design innovations, automation and data analytics, so that these abilities can be applied to creating Intelligent manufacturing systems in the Industry 4.0 setting.
- Our graduates will possess the practical skills and knowledge for innovating and managing the operations of modern manufacturing enterprises.
- These skills and knowledge will also be applicable to service industries and commercial enterprises, in automating and digitalizing their various business processes, to push for higher and higher efficiency.

We must deal quickly with the fusion of the online world and the world of industrial production. In Germany, we call it Industrie 4.0.
- Angela Merkel, Former Chancellor of Germany

Industry 4.0 is more than just a flashy catchphrase. A confluence of trends and technologies promises to reshape the way things are made.
- Cornelius Baur and Dominik Wee, McKinsey & Company

"
Curriculum

Graduation Engineering project
Showcase your abilities to innovate on systems and processes in enterprises

Elective courses
The third and fourth years of your study – freedom to follow your own path and interests
Advanced course to specialize in
• Data communications and Internet Technologies
• Intelligent Robot Design, Robotics, and Machine Vision
• Electronics, Optics, and Smart Sensors
• Advanced Technologies in Biomedical Devices
• Product Design and Innovation
• Contemporary Human Factors
• Project Management
• Data Visualization

Fundamental Courses in Intelligent Manufacturing Engineering
The second and third years of your study – to build up a firm foundation
• Essential Engineering Mathematics and Statistics
• Operations Research
• Quality and Reliability Engineering
• Automation Technologies/Manufacturing Technologies
• Digital Manufacturing and Operations
• AI and Augmented Reality in Manufacturing and Operations
• System Modeling and Optimization
• Semiconductor Manufacturing
• Industrial Data and Analytics

General Education Courses
The first year of your university study – the basics
• English
• Chinese
• Calculus
• Computer Programming
• Physics
• Introduction to Professional Engineering Practice

This figure shows the basic structure of our programme. It is subject to update.

“"The Fourth Industrial Revolution is still in its nascent state. But with the swift pace of change and disruption to business and society, the time to join in is now." - Gary Coleman, Global Industry and Senior Client Advisor, Deloitte Consulting

“"You’re either the one that creates the automation or you’re getting automated." - Tom Preston-Werner, Founder of GitHub

“"I believe this new program can provide graduates with essential trainings of qualitative and quantitative knowledge … and can help meet this huge need of manpower." - Eric Chen, CityU alumnus, Founder of Vitargent Biotechnology Ltd., Forber Asia 30 under 30 business leader 2017
Career prospect

- Engineer
- Management consultant in Big-4 and Major Management Consulting Firms
- Business Systems Analyst
- Manufacturing Engineering Manager
- Business Process Manager
- Data Scientist/ Analyst
- Digital Transformation Specialist
- Graduate/ Management Trainee

Why CityU?

1st A first undergraduate programme emphasizing intelligent manufacturing and Industry 4.0 in Hong Kong

54th Ranked 54th among the world’s top 200 universities (QS ranking 2023)

23rd Ranked 23rd among Asia’s top universities (QS ranking Asia 2023)

You can work in many different industries:

- Manufacturing
- Various service industries/ commercial enterprises that can benefit from digitalization
- Healthcare
- Transportation & Logistics
- Government
- Management consulting

Student life

- Exchange
  Experience student life in different countries
- Internship
  Opportunities for overseas and local internships
- Scholarship & awards
  We support and recognize outstanding students
- Activities
  Mentor schemes, company visits, career talks and guest lectures
