## *University Announcement*

### **Notification from the Emergency Response Unit (ERU) (101) Latest developments related to suspected Covid-19 cases and anti-virus arrangements**

The University was informed on 24 July that two staff members working in the To Yuen Building felt unwell and needed further medical assessment. President Way Kuo and Chief-of-Staff Professor Richard Yuen Kwok-kit called to give their sincere regards to the two staff members that afternoon. They were pleased to hear that their colleagues' family members were in good condition and assured them that the University would use its best efforts to provide appropriate assistance.

Today we are pleased to announce that after further assessment, the two colleagues tested negative for Covid-19.

On the other hand, the University has further strengthened its anti-virus measures and stepped up cleansing on campus. From tomorrow onwards, none of the canteens or restaurants on campus will provide dine-in services. Department heads are advised to refer to the Facilities Management Office [website](#) and make appropriate arrangements.

We urge everyone to face the volatile pandemic situation calmly and join together to fight the pandemic. We will continue to pay close attention to the situation, take all necessary steps and handle the situation carefully. For the benefit of both you and those around you, staff and students are strongly advised to maintain good personal hygiene and social distancing, no matter whether you are working from home or returning to the campus.

We wish you and your family members safety and good health.
