University Announcement

Notification from the Emergency Response Unit (ERU) (140) Do our part and fight the virus together

The safety of our staff and students is our top priority. The University has been monitoring the development of the pandemic closely since last year. We took the lead to adopt a number of anti-virus measures.

University is a place where intellectuals gather. We believe that it is not a suitable place for paternalistic governance.

CityU encourages faculty, students, and staff to consider vaccinations according to their personal circumstances. We believe the University community will make appropriate judgments, pay attention to personal hygiene, and maintain social distancing.

We will continue to follow developments and look forward to the government's effective vaccination policy. We will follow government's anti-pandemic policies and guidelines and take the necessary actions to protect the safety of faculty, staff, and students.
