# GE3104: DATA IS BEAUTIFUL: VISUALIZATION IN THE HUMANITIES

#### **Effective Term**

Semester A 2022/23

# Part I Course Overview

#### **Course Title**

Data is Beautiful: Visualization in the Humanities

## **Subject Code**

GE - Gateway Education

#### **Course Number**

3104

#### **Academic Unit**

Linguistics and Translation (LT)

#### College/School

College of Liberal Arts and Social Sciences (CH)

#### **Course Duration**

One Semester

#### **Credit Units**

3

## Level

B1, B2, B3, B4 - Bachelor's Degree

## GE Area (Primary)

Area 1 - Arts and Humanities

#### **Medium of Instruction**

English

## **Medium of Assessment**

English

## Prerequisites

Nil

#### **Precursors**

Nil

## **Equivalent Courses**

Nil

#### **Exclusive Courses**

Nil

# **Part II Course Details**

#### **Abstract**

Visualization offers powerful methods to help us understand the world around us. It is used to reveal the hidden connections, patterns and stories inside any dataset, whether it is the patterns in a great literary work, the timelines of a historical collection or the geographic distribution of important archaeological sites. Furthermore, the density of information now available to scholars in a networked and digital era is enormous. We are inundated with thousands of words on e-mails, tweets, digital documents and web pages every day. As the sheer volume overwhelms one's ability to digest text-based information in the traditional way, we increasingly rely on visualization methods to help us summarize and analyze documents and textual data. Humanists, including artists and designers, are developing visualizations as essential ways in which to 'see' their data.

The theoretical aspect of this course offers students a general introduction to data visualization, visual complexity and information aesthetics. The applied aspect of this course focuses on the visualization of documents and textual data. Students will learn the fundamentals of visualization techniques on textual data, evaluate their benefits and drawbacks, and apply them in a hands-on term project.

## **Course Intended Learning Outcomes (CILOs)**

	CILOs	Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Develop a critical generalized knowledge of information visualization principles and examples based on humanities datasets.		x		
2	Apply visualization methods on a text, and demonstrate the benefits and pitfalls of these techniques.			x	
3	Demonstrate understanding of the goals, strengths and weaknesses of the major visualization methods.		x	x	
4	Gain hands-on experience on a term project that applies a visualization method.				X

#### A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

#### A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

## A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

#### **Teaching and Learning Activities (TLAs)**

	TLAs	<b>Brief Description</b>	CILO No.	Hours/week (if applicable)
1	Lecture	Exposition on fundamentals of visualization and its applications to the humanities	1, 2, 3	

2	Hands-on exercises on using and designing	2, 3, 4	
	visualization interfaces		

#### Assessment Tasks / Activities (ATs)

	ATs	CILO No.	Weighting (%)	Remarks (e.g. Parameter for GenAI use)
1	Term project	2, 3, 4	30	
2	Assignment (one)	2, 3, 4	20	
3	Quiz (one)	1, 2, 3	20	

#### Continuous Assessment (%)

70

#### **Examination (%)**

30

#### **Examination Duration (Hours)**

2

#### Assessment Rubrics (AR)

#### Assessment Task

1. Term project

#### Criterion

Ability to select an appropriate visualization technique for documents or textual data, to produce a meaningful and aesthetically pleasing visualization for the data, and critically assess its quality and usefulness

#### Excellent (A+, A, A-)

The student demonstrates a high level of proficiency in the design and analysis of the visualization

## Good (B+, B, B-)

The student demonstrates a significant level of proficiency in the design and analysis of the visualization

#### Fair (C+, C, C-)

The student demonstrates a moderate level of proficiency in the design and analysis of the visualization

#### Marginal (D)

The student demonstrates a basic level of proficiency in the design and analysis of the visualization

#### Failure (F)

The student does not demonstrate even a marginal level of proficiency in the design and analysis of the visualization

#### **Assessment Task**

2. Examination

## Criterion

Ability to demonstrate a critical understanding of the concepts of visualization the applications of visualization techniques in the humanities, and their strengths and limitations in facilitating analysis of language data

## Excellent (A+, A, A-)

The student demonstrates a high level of understanding of the concepts and proficiency in completing the required tasks

4 GE3104: Data is Beautiful: Visualization in the Humanities

#### Good (B+, B, B-)

The student demonstrates a significant level of understanding of the concepts and proficiency in completing the required tasks

## Fair (C+, C, C-)

The student demonstrates a moderate level of understanding of the concepts and proficiency in completing the required tasks

#### Marginal (D)

The student demonstrates a basic level of understanding of the concepts and proficiency in completing the required tasks

## Failure (F)

The student does not demonstrate even a marginal level of understanding of the concepts and proficiency in completing the required tasks

#### **Assessment Task**

3. Quiz

#### Criterion

Ability to demonstrate an understanding of the theory of data visualization techniques, their applications in the humanities, and their strengths and limitations

#### Excellent (A+, A, A-)

The student demonstrates a high level of understanding of the relevant concepts

#### Good (B+, B, B-)

The student demonstrates a significant level of understanding of the relevant concepts

#### Fair (C+, C, C-)

The student demonstrates a moderate level of understanding of the relevant concepts

## Marginal (D)

The student demonstrates a basic level of understanding of the relevant concepts

#### Failure (F)

The student does not demonstrate even a marginal level of understanding of the relevant concepts

#### **Assessment Task**

4. Assignment

#### Criterion

Ability to apply visualization techniques on documents or other textual data, and analyze their strengths and limitations

#### Excellent (A+, A, A-)

The student demonstrates a high level of proficiency in completing the required tasks

## Good (B+, B, B-)

The student demonstrates a significant level of proficiency in completing the required tasks

#### Fair (C+, C, C-)

The student demonstrates a moderate level of proficiency in completing the required tasks

#### Marginal (D)

The student demonstrates a basic level of proficiency in completing the required tasks

#### Failure (F)

The student does not demonstrate even a marginal level of proficiency in completing the required tasks

# Part III Other Information

## **Keyword Syllabus**

Information visualization; interactive visualization; digital humanities; textual analysis; computational linguistics

#### **Reading List**

#### **Compulsory Readings**

	Title
1	Steele, Julie & Noah Iliinsky (2010). Beautiful Visualization: Looking at Data through the Eyes of Experts. O' Reilly.
2	Stanford Literary Lab Pamphlets (https://litlab.stanford.edu/pamphlets/)

## **Additional Readings**

	Title
1	Harmon, Katharine & Gayle Clemans. The Map as Art: Contemporary Artists Explore Cartography.
2	Lima, Manuel. Visual Complexity: Mapping Patterns of Information.
3	McCandless, David. Information is Beautiful.
4	Cherven, Ken (2013). Network Graph Analysis and Visualization with Gephi. Packt Publishing.
5	Tufte, Edward. Visual Explanations: Images and Quantities, Evidence and Narrative.
6	Tufte, Edward. Envisioning Information.
7	Ware, Colin. Visual Thinking: for Design (Morgan Kaufmann Series in Interactive Technologies).

# Annex (for GE courses only)

A. Please specify the Gateway Education Programme Intended Learning Outcomes (PILOs) that the course is aligned to and relate them to the CILOs stated in Part II, Section 2 of this form:

Please indicate which CILO(s) is/are related to this PILO, if any (can be more than one CILOs in each PILO)

## PILO 1: Demonstrate the capacity for self-directed learning

4

PILO 2: Explain the basic methodologies and techniques of inquiry of the arts and humanities, social sciences, business, and science and technology

PILO 3: Demonstrate critical thinking skills

2, 3

PILO 4: Interpret information and numerical data

3, 4

PILO 5: Produce structured, well-organised and fluent text

4

6

## PILO 6: Demonstrate effective oral communication skills

Δ

PILO 7: Demonstrate an ability to work effectively in a team

4

PILO 10: Demonstrate the attitude and/or ability to accomplish discovery and/or innovation

4

B. Please select an assessment task for collecting evidence of student achievement for quality assurance purposes. Please retain at least one sample of student achievement across a period of three years.

#### **Selected Assessment Task**

Term project, where student will apply a visualization method and analyze its strengths and weaknesses
