## MA3525: ELEMENTARY NUMERICAL METHODS

## Effective Term

Semester A 2022/23

## Part I Course Overview

Course Title
Elementary Numerical Methods

## Subject Code

MA - Mathematics
Course Number
3525
Academic Unit
Mathematics (MA)
College/School
College of Science (SI)
Course Duration
One Semester

## Credit Units

3
Level
B1, B2, B3, B4 - Bachelor's Degree
Medium of Instruction
English
Medium of Assessment
English
Prerequisites
MA2503 Linear Algebra; or MA1503 Linear Algebra with Applications
Precursors
Nil
Equivalent Courses
Nil
Exclusive Courses
Nil

## Part II Course Details

#### Abstract

This course aims to give an introduction of elementary numerical methods. It trains students to apply numerical methods in solving problems in calculus, linear algebra and differential equations, as well as to use software packages in writing computer

programs and analyzing solutions of problems. The course also serves to give students practice in clear and concise written and spoken communication of the results of an investigation.

Course Intended Learning Outcomes (CILOs)

|  | CILOs | Weighting (if DEC-A1 app.) |  | DEC-A2 | DEC-A3 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | manipulate computing software packages, such as MATLAB, as tools in solving and analyzing solutions of problems. | 0 |  |  |  |
| 2 | design programs of numerical computation with MATLAB. | 0 |  |  |  |
| 3 | explain clearly mathematical concepts of basic numerical methods. | 10 | X |  |  |
| 4 | apply computational techniques in linear algebra, such as solving a linear system, matrix eigenvalue problem and the least squares problem. | 40 | X | X | X |
| 5 | evaluate integrals and interpolating polynomials numerically. | 20 | X | X |  |
| 6 | solve nonlinear equations by using an algorithmic approach technique. | 20 | X | X | X |
| 7 | the combination of CILOs 1-6 | 10 | X | X | x |

A1: Attitude
Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability
Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments
Demonstrate accomplishment of discovery/innovation/creativity through producing/constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Teaching and Learning Activities (TLAs)

| TLAs |  | Brief Description |  | CILO No. <br> Hopplicable) |
| :--- | :--- | :--- | :--- | :--- |
| 1 | Lecture | Learning through <br> teaching is primarily <br> based on lectures. | $1,2,3,4,5,6,7$ | 39 hours in total |
| 2 | Take-home assignments | Learning through <br> tutorials is primarily <br> based on interactive <br> problem solving and <br> hand-on computer <br> exercises allowing instant <br> feedback. | 1,2 | 2 hours |

| 3 | Take-home assignments | Learning through <br> tutorials is primarily <br> based on interactive <br> problem solving and <br> hand-on computer <br> exercises allowing instant <br> feedback. | 3 | 1 hour |
| :--- | :--- | :--- | :--- | :--- |
| 4 | Take-home assignments | Learning through <br> tutorials is primarily <br> based on interactive <br> problem solving and <br> hand-on computer <br> exercises allowing instant <br> feedback. | 4 | 4 hours |
| 5 | Take-home assignments | Learning through <br> tutorials is primarily <br> based on interactive <br> problem solving and <br> hand-on computer <br> exercises allowing instant <br> feedback. | 5 | 3 hours |
| 6 | Take-home assignments | Learning through <br> tutorials is primarily <br> based on interactive <br> problem solving and <br> hand-on computer <br> exercises allowing instant <br> feedback. | 6 | after-class |
| 8 | Online applications | Math Help Centre |  | a hours |

## Assessment Tasks / Activities (ATs)

| ATs CILO No. |  | Weighting (\%) |  | Remarks (e.g. Parameter <br> for GenAI use) |
| :--- | :--- | :--- | :--- | :--- |
| 1 | Test | $3,4,5$ | 20 | Questions are designed <br> for the first part of the <br> course to see how well <br> the students have learned <br> the basic concepts of <br> numerical methods and <br> their applications in <br> solving problems of linear <br> algebra and polynomial <br> interpolation. |
| 2 | Hand-in assignments | $1,2,3,4,5,6$ | These are skills based <br> assessment to enable <br> students to approach <br> mathematical problems <br> via numerical means <br> and to analyze solutions <br> with the aid of computing <br> software packages. |  |

| 3 | Project(s) | $1,4,5,6$ | 0 | Students are assessed <br> on their ability in <br> applying numerical and <br> computational methods <br> to solve mathematical <br> problems, as well as <br> on the presentation of <br> numerical results with <br> analysis. |
| :--- | :--- | :--- | :--- | :--- |
| 4 | Formative take-home <br> assignments | $1,2,3,4,5,6$ | 0 | The assignments provide <br> students chances to <br> demonstrate their <br> achievements on <br> numerical methods <br> learned in this course. |

## Continuous Assessment (\%)

30

## Examination (\%)

70

## Examination Duration (Hours)

3

## Additional Information for ATs

30\% Coursework
70\% Examination (Duration: 3 hours, at the end of the semester)

For a student to pass the course, at least $30 \%$ of the maximum mark for the examination must be obtained.

## Assessment Rubrics (AR)

## Assessment Task

1. Test

## Criterion

ABILITY to APPLY and EXPLAIN the basic concepts and methodology of numerical methods

## Excellent (A+, A, A-)

High
Good (B+, B, B-)
Significant
Fair (C+, C, C-)
Moderate

## Marginal (D)

Basic

## Failure (F)

Not even reaching marginal levels

## Assessment Task

2. Hand-in assignments

Criterion
CAPACITY for LEARNING to understand the principles of numerical methods
Excellent (A+, A, A-)
High
Good (B+, B, B-)
Significant
Fair (C+, C, C-)
Moderate
Marginal (D)
Basic
Failure (F)
Not even reaching marginal levels

## Assessment Task

3. Projects

## Criterion

N.A.

## Assessment Task

4. Examination

## Criterion

ABILITY to ANALYZE and DEVELOP numerical methods
Excellent (A+, A, A-)
High
Good (B+, B, B-)
Significant
Fair (C+, C, C-)
Moderate
Marginal (D)
Basic
Failure (F)
Not even reaching marginal levels

## Assessment Task

5. Formative take-home assignments

## Criterion

CAPACITY for LEARNING to understand the principles of numerical methods
Excellent (A+, A, A-)
High
Good (B+, B, B-)
Significant
Fair (C+, C, C-)
Moderate
Marginal (D)
Basic
Failure (F)
Not even reaching marginal levels

## Part III Other Information

## Keyword Syllabus

MATLAB for numerical computation, Computer Arithmetics. Linear System of Equations. Polynomial Interpolation and Splines. Numerical Integration. Least Squares Problems. Matrix Eigenvalue Problem. Root-finding Methods.

## Reading List

Compulsory Readings

| Title |  |
| :--- | :--- |
| 1 | Richard L. Burden and J. Douglas Faires, Numerical Analysis, 9th edition, Brooks/Cole |
| 2 | Mark H. Holmes, Introduction to Scientific Computing and Data Analysis, Springer |

## Additional Readings

| Title |  |
| :--- | :--- |
| 1 | Nil |
