Part II Course Details

Abstract

This course aims to help students investigate the ethical basis of health care policy and guides them to draw on both the Western and Chinese moral resources to address ethical issues involved in health care systems, resource distribution,

decision making, and other important ethical and policy issues. Students will be stimulated to reflect critically on their own values and to formulate justifiable judgements of contemporary health care policy and bioethical issues. Specifically, the course will

- (a) Explore and evaluate the basic values underpinning the organization and financing of health care allocation;
- (b) Examine ethical and policy issues in relation to elderly care, universal health coverage, prevention and control of non-communicable and infectious diseases and addressing social determinants of health.

Course Intended Learning Outcomes (CILOs)

CILOs		Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Discover new knowledge and create new ideas in the social, cultural and ethical context of health care policy.		x	x	x
2	Analyse and evaluate critically three major ethical discourses on health care as well as their underlying moral bearings: justice in health care system, clinical decision-making, and ethical and policy challenges by new bio-medical circumstances and technologies.		x	x	x
3	Apply key concepts and ideas in modern liberal and traditional Confucian ethical traditions to discuss health care policy issues; construct rational and persuasive arguments to justify their own point of views.		x	x	x
4	Judge independently on the concepts, theories and approaches covered in this course, and apply them to analyze other relevant ethical issues in health care; apply critical and communicative skills in ethical judgment and philosophical principles to guide policy formulation and decision making in health care.		x	x	x

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Teaching and Learning Activities (TLAs)

	TLAs	Brief Description	CILO No.	Hours/week (if applicable)
1	Seminar	Include both lectures (which will identify key problems in the ethics of health care, introduce and evaluate relevant ideas and theories, illustrate their applications with policy analysis and cases studies) and feasible student discussions (which will enhance students' ability to critically evaluate different ethical positions on health care policy issues, and improve their ability to construct rational and persuasive arguments; discover new knowledge and create new ideas in health care; strengthen their teamwork and communication skills).	1, 2, 3, 4	3-hour
2	Presentation	Students will conduct individual or group presentation on relevant topics to improve their analytical ability and ethical comprehension as well as their communication skills.	1, 2, 3, 4	
3	Individual paper writing	Apply and test each student's ability to research, analyse and resolve contemporary health care issues, and communicate their conclusions or solutions in writing.	1, 2, 3, 4	
4	Reading	Three to four articles or book chapters per week.	1, 2, 3, 4	

Assessment Tasks / Activities (ATs)

	ATs	CILO No.	Weighting (%)	Remarks (e.g. Parameter for GenAI use)
1	Individual paper	1, 2, 3, 4	30	
2	Quiz(zes)	1, 2, 3, 4	50	

3	Individual/group presentation	1, 2, 3, 4	20	
---	-------------------------------	------------	----	--

Continuous Assessment (%)

100

Examination (%)

Assessment Rubrics (AR)**Assessment Task**

1. Individual paper

Criterion

Ability to research, analyse and resolve contemporary health care issues, and communicate their arguments, conclusions or solutions in writing.

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching minimal levels

Assessment Task

2. Quiz(zes)

Criterion

Capacity for actively learning and mastering different ethical theories and positions bearing on health care policy challenges and issues.

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching minimal levels

Assessment Task

3. Individual/group presentation

Criterion

Capacity for analysing issues and mastering ethical concepts and theories, capacity for communication skills

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)Not even reaching minimal levels

Part III Other Information**Keyword Syllabus**

Health care policy, ethics, bioethics, health care values, liberal ethical perspective, Confucian ethical perspective, health distribution, financing, rationing, managed care, elderly care, access to health care, prevention and control of non-communicable diseases and infectious diseases, hospital ethics committee, informed consent, truth-telling, advance directives, surrogate decision-making, artificial insemination, in vitro fertilization, human cloning, genetic ethics, stem-cell research, definition of death, euthanasia.
