SDSC3011: SOCIAL DATA PROCESSING AND MODELLING

Effective Term Semester B 2023/24

Part I Course Overview

Course Title Social Data Processing and Modelling

Subject Code SDSC - School of Data Science Course Number 3011

Academic Unit School of Data Science (DS)

College/School School of Data Science (DS)

Course Duration One Semester

Credit Units

Level B1, B2, B3, B4 - Bachelor's Degree

Medium of Instruction English

Medium of Assessment English

Prerequisites SDSC1001 Introduction to Data Science* and SDSC2001 Python for Data Science

*Pre-requisite SDSC1001 will be exempted for students who are enrolled in Minor in Data Science

Precursors Nil Equivalent Courses Nil Exclusive Courses

Nil

Part II Course Details

Abstract

This course provides students with an extensive exposure to the elements of data processing and modelling for social media. Topics include human error detection, missing data handling, record aggregation, data integration, categorical variable modelling, multivariate data modelling, multilevel data modelling, latent data modelling, temporal data modelling, and spatial data modelling.

Course Intended Learning Outcomes (CILOs)

	CILOs	Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Explain clearly fundamental principles and methods of social media data processing and modelling	20	x		
2	Classify various properties of social media data and the corresponding modelling methods	20	Х	Х	
3	Evaluate existing practices in processing and modelling of social media data and seek ways to improve the existing practices	30	x	x	x
4	Apply appropriate processing/modelling methods to solve given practical problems in social media data	30	x	x	x

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

	TLAs	Brief Description	CILO No.	Hours/week (if applicable)
1	Lecture	Learning through teaching is primarily based on lectures.	1, 2, 3, 4	39 hours in total
2	Case studies	Describe and critique classic cases of social media data processing and modelling.	2, 3, 4	in or after classes

Teaching and Learning Activities (TLAs)

3	Take-home assignments	Learning through in-	2, 3, 4	in or after class
		class or take-home		
		assignments is primarily		
		based on interactive		
		problem solving and		
		hands-on exercises		
		allowing instant		
		feedback.		

Assessment Tasks / Activities (ATs)

	ATs	CILO No.	Weighting (%)	Remarks (e.g. Parameter for GenAI use)
1	Test	1, 2, 3, 4	20	Questions are designed for basic characteristics of social data to see how well the students have learned fundamental concepts and methods, and applications of social data processing. (20-40%)
2	Hands-in assignments	3, 4	30	These are skills based assessment to enable students to demonstrate the basic concepts and methods of social data modelling, and applications of the models in some applications. (0-30%)

Continuous Assessment (%)

50

Examination (%)

50

Examination Duration (Hours)

2

Additional Information for ATs

Note: To pass the course, apart from obtaining a minimum of 40% in the overall mark, a student must also obtain a minimum mark of 30% in both continuous assessment and examination components.

Assessment Rubrics (AR)

Assessment Task

Test

Criterion

Ability to understand and apply fundamental concepts and methods of social media data processing.

Excellent (A+, A, A-) High

Good (B+, B, B-) Significant

Fair (C+, C, C-) Moderate

Marginal (D) Basic

Failure (F) Not even reaching marginal levels

Assessment Task

Hands-in assignments

Criterion

Ability to learn the basic concepts, apply methods and algorithms of social data modelling, and develop applications of modelling algorithms.

Excellent (A+, A, A-) High

Good (B+, B, B-)

Significant

Fair (C+, C, C-) Moderate

Marginal (D) Basic

Failure (F) Not even reaching marginal levels

Assessment Task

Examination

Criterion Ability to solve learning tasks using social media data modelling methods.

Excellent (A+, A, A-)

High

Good (B+, B, B-) Significant

Fair (C+, C, C-) Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Part III Other Information

Keyword Syllabus

Human error detection, missing data imputation, data transformation, record aggregation, data integration, multivariate data modelling, multilevel data modelling, latent data modelling, temporal data modelling, and spatial data modelling
