

SS4571: DIGITAL SOCIOLOGY AND BIG DATA RESEARCH

Effective Term

Semester A 2022/23

Part I Course Overview

Course Title

Digital Sociology and Big Data Research

Subject Code

SS - Social and Behavioural Sciences

Course Number

4571

Academic Unit

Social and Behavioural Sciences (SS)

College/School

College of Liberal Arts and Social Sciences (CH)

Course Duration

One Semester

Credit Units

3

Level

B1, B2, B3, B4 - Bachelor's Degree

Medium of Instruction

English

Medium of Assessment

English

Prerequisites

Nil

Precursors

Nil

Equivalent Courses

Nil

Exclusive Courses

Nil

Part II Course Details

Abstract

Digital innovation is enabling new ways of knowing society, from online surveillance to behavioural analytics and real-time research. Big data is also perceived as transforming science and social science. These new forms of computational social science have sparked intense debates across disciplines including sociology, computing and data science in recent years. This course will provide an overview of these debates, and offers an introduction to the key epistemic, methodological and normative issues they raise. Students will have hands-on experience, through workshops sessions to experiment with digital methods in order to imagine new ways of practicing sociology with technology.

Course Intended Learning Outcomes (CILOs)

	CILOs	Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Understanding the basic concepts related to digital sociology.		x	x	x
2	To examine key methodological and epistemological challenges involved in conducting social research with big data.		x	x	x
3	Critically engage with the ways in which big data problematise core methodological issues in research.		x	x	x
4	Apply general issues involved in doing research with big data to more specific thematic areas of study (e.g. politics, sports, health, etc.).		x	x	x

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Teaching and Learning Activities (TLAs)

	TLAs	Brief Description	CILO No.	Hours/week (if applicable)
1	TLA1: Lecture	It introduces key issues in digital sociology, including rise of social media, participation, new analytics, inter-disciplinarily, public controversies about digital ways of knowing.	1, 2, 3, 4	

2	TLA2: Workshop	It focuses on digital sociology in practice. Including sessions with practice-based understanding on the usage of big data tools for conducting experiments related to digital social research.	2, 3, 4	
3	TLA3: Class discussion	It engages students in vibrant class discussion issues about digital sociology in class. The discussion is pertinent to lessons taught.	1, 2, 3, 4	

Assessment Tasks / Activities (ATs)

ATs		CILO No.	Weighting (%)	Remarks (e.g. Parameter for GenAI use)
1	AT1: Workshop Exercises	1, 2, 3, 4	20	
2	AT2: Group Project	1, 2, 3, 4	40	
3	AT3: Term Paper	1, 2, 3, 4	40	

Continuous Assessment (%)

100

Examination (%)

0

Assessment Rubrics (AR)**Assessment Task**

1. Workshop Exercises

Criterion

Understanding of the skills and techniques accurately.

Excellent (A+, A, A-)

Accurate implementations of the analysis and skilfully present the results and findings.

Good (B+, B, B-)

With minor mistakes in analysis and presentation.

Fair (C+, C, C-)

With major mistakes in analysis and presentation.

Marginal (D)

With significant mistakes. But demonstrated adequate effort.

Failure (F)

Does not demonstrate the minimum expectation.

Assessment Task

2. Group Project

Criterion

Articulation of theory, findings, and conclusion coherently.

Excellent (A+, A, A-)

An excellent project# very good mastery of the ideas or concepts, with excellent or innovative analysis and presentation of ideas.

Good (B+, B, B-)

With reasonably good analysis and presentation.

Fair (C+, C, C-)

Demonstrating effort that adequate for a passing grade, but with enough flaws and shortcomings.

Marginal (D)

Barely a pass. Many serious flaws and shortcomings, but adequate effort and some research

Failure (F)

Does not demonstrate the minimum expectation.

Assessment Task

3. Term Paper

Criterion

Critically discuss the identified issue and manage to recognise and apply the theory accurately.

Excellent (A+, A, A-)

An excellent paper# very good mastery of the ideas or concepts, with excellent or innovative analysis.

Good (B+, B, B-)

A solid paper with reasonably good analysis

Fair (C+, C, C-)

Demonstrating effort that adequate for a passing grade, but with enough flaws and shortcomings.

Marginal (D)

Barely a pass. Many serious flaws and shortcomings, but adequate effort and some research

Failure (F)

Does not demonstrate the minimum research effort.

Part III Other Information

Keyword Syllabus

1. Algorithm
2. Big data
3. Privacy
4. Computational social science
5. Culture of connectivity
6. Data mining

7. Digital social research
8. Digital sociology
9. Digital world
10. Machine learning
11. Social media
