

CA3417: MANAGEMENT FOR CONSTRUCTION

Effective Term

Semester A 2025/26

Part I Course Overview

Course Title

Management for Construction

Subject Code

CA - Civil and Architectural Engineering

Course Number

3417

Academic Unit

Architecture and Civil Engineering (CA)

College/School

College of Engineering (EG)

Course Duration

One Semester

Credit Units

3

Level

B1, B2, B3, B4 - Bachelor's Degree

Medium of Instruction

English

Medium of Assessment

English

Prerequisites

Nil

Precursors

Nil

Equivalent Courses

Nil

Exclusive Courses

Nil

Part II Course Details

Abstract

The course aims to apply various management techniques in complicated construction projects in the area of time, cost, quality, safety, and environment for designing, planning, organizing complicated construction projects in the industry.

Course Intended Learning Outcomes (CILOs)

CILOs		Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Describe job natures to different stakeholders in construction team	20	x		
2	Explain project cost and cash flow	20		x	
3	Design an optimistic programme	20		x	
4	Describe principals to control and monitor the quality of construction projects;	20		x	
5	Explore the Construction Management in real cases	20		x	

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Learning and Teaching Activities (LTAs)

LTAs		Brief Description	CILO No.	Hours/week (if applicable)
1	Lecture	Students will gain conceptual overview of construction management (including construction planning, control and programming technique, cost control and cash flow management, organisation structure, human resource management, quality control, health and safety management, environment management) in lectures.	1, 2, 3, 4, 5	

2	Project	Students will work in groups to consolidate their learnings to investigate real cases of construction management problems in construction industry	1, 2, 3, 4, 5	
---	---------	--	---------------	--

Assessment Tasks / Activities (ATs)

	ATs	CILO No.	Weighting (%)	Remarks ("- " for nil entry)	Allow Use of GenAI?
1	Mid-term Test	2, 3, 4	25	summative assessment	No
2	Assignment	1, 5	25	formative assessment	Yes

Continuous Assessment (%)

50

Examination (%)

50

Examination Duration (Hours)

3

Minimum Continuous Assessment Passing Requirement (%)

30

Minimum Examination Passing Requirement (%)

30

Additional Information for ATs

To pass a course, a student must obtain minimum marks of 30% in both coursework and examination components, and an overall mark of at least 40%.

Assessment Rubrics (AR)**Assessment Task**

Mid-term Test

Criterion

CAPACITY to DISCUSS the roles, functions and responsibilities of project managers; ABILITY to USE the scientific techniques in solving the planning and control problems.

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Assessment Task

Assignment

Criterion

ABILITY to APPLY suitable techniques to plan a construction project.

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Assessment Task

Examination

Criterion

CAPACITY to RELATE and EXPLAIN the management theories and principles to construction management; DISCUSS the roles, functions and responsibilities of construction professionals; ABILITY to USE the scientific techniques in solving the planning and control problems.

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Part III Other Information

Keyword Syllabus

Organisational structure, project team, leadership, Cost Control; Project Planning, Quality Management; Risk Management, Health and Safety Management, Environmental Management
