

CA4623: MAINTENANCE TECHNOLOGY AND MANAGEMENT

Effective Term

Semester A 2026/27

Part I Course Overview

Course Title

Maintenance Technology and Management

Subject Code

CA - Civil and Architectural Engineering

Course Number

4623

Academic Unit

Architecture and Civil Engineering (CA)

College/School

College of Engineering (EG)

Course Duration

One Semester

Credit Units

3

Level

B1, B2, B3, B4 - Bachelor's Degree

Medium of Instruction

English

Medium of Assessment

English

Prerequisites

Nil

Precursors

Nil

Equivalent Courses

BC4623/BC4623F/BC4623P Maintenance Technology and Management

Exclusive Courses

Nil

Part II Course Details

Abstract

The Course aims to equip students with the knowledge and ability to appraise existing buildings and develop suitable schemes of maintenance, repair, refurbishment or rehabilitation as necessary; the knowledge of building defects' diagnosis and repair methodology, including the use of drone inspection and advanced technologies; management of building maintenance projects; and statutory requirements for building repair and maintenance.

Course Intended Learning Outcomes (CILOs)

CILOs		Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Describe the principles of building design to anticipate and prevent building component failure;	25		x	
2	determineExplain the condition of the structure, fabric and component materials and prepare maintenance plans for different building types and client needs including the management of building maintenance projects;	25		x	
3	Apply building defects diagnosis techniques, including defects reporting photogrammetry and drone inspection, and recommend different repair approaches based on visual and analytical data	25			x
4	Explain the statutory requirements relating to building repair and maintenance.	25	x		

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Learning and Teaching Activities (LTAs)

LTAs		Brief Description	CILO No.	Hours/week (if applicable)
1	Lecture	Student will engage to gain the key principles, theories and tools for maintenance technology and management	1, 2, 3, 4	2 hours/week
2	Tutorial	Students will engage in tutorial to discuss the concepts and solve the problems in construction management individually or in a group basis in the tutorial class.	1, 2, 3, 4	1 hour/week

3	Assignment	Students will engage to take on the role of a project manager or a maintenance surveyor for planning a series of tasks under a given scenario; and to create feasible time and resource management plans by application of suitable tools with reasonable assumptions	1, 2, 3	
---	------------	---	---------	--

Assessment Tasks / Activities (ATs)

ATs		CILO No.	Weighting (%)	Remarks ("- " for nil entry)	Allow Use of GenAI?
1	Mid-term Test	1, 2, 3, 4	20		No
2	Assignment	1, 2, 3	30		Yes

Continuous Assessment (%)

50

Examination (%)

50

Examination Duration (Hours)

3

Minimum Continuous Assessment Passing Requirement (%)

30

Minimum Examination Passing Requirement (%)

30

Additional Information for ATs

To pass a course, a student must obtain minimum marks of 30% in both coursework and examination components, and an overall mark of at least 40%

Assessment Rubrics (AR)**Assessment Task**

Mid-term Test

Criterion

- 1.1 CAPACITY to DISCUSS key principles, theories and tools for maintenance technology
- 1.2 ABILITY to USE the scientific techniques in solving the maintenance related problems

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Assessment Task

Assignment

Criterion

2.1 ABILITY to APPLY suitable techniques to repair defect in existing structures

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Assessment Task

Examination

Criterion

3.1 CAPACITY to RELATE and EXPLAIN the management theories and principles to maintenance technology, and DISCUSS the roles, functions and responsibilities of different parties in a building maintenance project

3.2 ABILITY to USE the scientific techniques in solving the maintenance and repair problems

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Part III Other Information

Keyword Syllabus

- Maintenance technology: diagnosis of defects in materials, components, assemblies and elements; destructive & non-destructive testing; recognition of causes and selection of appropriate remedial methods; drone inspection for defect identification; AI defects analytics; defects reporting photogrammetry.
- Maintenance inspection/ survey: historical buildings repair/maintenance matters; environmental issues in building maintenance; drone-based surveys; integration of photogrammetry in inspection reporting
- Maintenance management: statutory requirements relating to building repair and maintenance; maintenance project management.
