

DSC3011: SOCIAL DATA PROCESSING AND MODELLING

Effective Term

Semester A 2026/27

Part I Course Overview

Course Title

Social Data Processing and Modelling

Subject Code

DSC - Data Science

Course Number

3011

Academic Unit

Data Science (DS)

College/School

College of Computing (CC)

Course Duration

One Semester

Credit Units

3

Level

B1, B2, B3, B4 - Bachelor's Degree

Medium of Instruction

English

Medium of Assessment

English

Prerequisites

SDSC1001 Introduction to Data Science* and SDSC2001 Python for Data Science ; or
DSC1001 Introduction to Data Science* and DSC2001 Python for Data Science

*Pre-requisite SDSC1001 or DSC1001 will be exempted for students who are enrolled in Minor in Data Science

Precursors

Nil

Equivalent Courses

SDSC3011 Social Data Processing and Modelling

Exclusive Courses

Nil

Part II Course Details

Abstract

This course provides students with an extensive exposure to the elements of data processing and modelling for social media. Topics include human error detection, missing data handling, record aggregation, data integration, categorical variable modelling, multivariate data modelling, multilevel data modelling, latent data modelling, temporal data modelling, and spatial data modelling.

Course Intended Learning Outcomes (CILOs)

CILOs		Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Explain clearly fundamental principles and methods of social media data processing and modelling	20	x		
2	Classify various properties of social media data and the corresponding modelling methods	20	x	x	
3	Evaluate existing practices in processing and modelling of social media data and seek ways to improve the existing practices	30	x	x	x
4	Apply appropriate processing/modelling methods to solve given practical problems in social media data	30	x	x	x

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Learning and Teaching Activities (LTAs)

LTAs		Brief Description	CILO No.	Hours/week (if applicable)
1	Lecture	Students will engage in formal lectures to gain knowledge about social data processing and modelling.	1, 2, 3, 4	39 hours in total
2	Case studies	Students will describe and critique classic cases of social media data processing and modelling.	2, 3, 4	in or after classes

Assessment Tasks / Activities (ATs)

ATs		CILO No.	Weighting (%)	Remarks ("- for nil entry)	Allow Use of GenAI?
1	Test	1, 2, 3, 4	20	Questions are designed for basic characteristics of social data to see how well the students have learned fundamental concepts and methods, and applications of social data processing. (20-40%)	No
2	Hands-in assignments	3, 4	30	These are skills based assessment to enable students to demonstrate the basic concepts and methods of social data modelling, and applications of the models in some applications. (0-30%)	Yes

Continuous Assessment (%)

50

Examination (%)

50

Examination Duration (Hours)

2

Minimum Continuous Assessment Passing Requirement (%)

30

Minimum Examination Passing Requirement (%)

30

Additional Information for ATs

Note: To pass the course, apart from obtaining a minimum of 40% in the overall mark, a student must also obtain a minimum mark of 30% in both continuous assessment and examination components.

Assessment Rubrics (AR)**Assessment Task**

Test

Criterion

Ability to understand and apply fundamental concepts and methods of social media data processing.

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Assessment Task

Hands-in assignments

Criterion

Ability to learn the basic concepts, apply methods and algorithms of social data modelling, and develop applications of modelling algorithms.

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Assessment Task

Examination

Criterion

Ability to solve learning tasks using social media data modelling methods.

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Part III Other Information

Keyword Syllabus

Human error detection, missing data imputation, data transformation, record aggregation, data integration, multivariate data modelling, multilevel data modelling, latent data modelling, temporal data modelling, and spatial data modelling
