

SYE4005: INDUSTRIAL DATA AND MANUFACTURING ANALYTICS

Effective Term

Semester A 2025/26

Part I Course Overview

Course Title

Industrial Data and Manufacturing Analytics

Subject Code

SYE - Systems Engineering

Course Number

4005

Academic Unit

Systems Engineering (SYE)

College/School

College of Engineering (EG)

Course Duration

One Semester

Credit Units

3

Level

B1, B2, B3, B4 - Bachelor's Degree

Medium of Instruction

English

Medium of Assessment

English

Prerequisites

Nil

Precursors

Nil

Equivalent Courses

ADSE4005 Industrial Data and Manufacturing Analytics

Exclusive Courses

Nil

Part II Course Details

Abstract

In this course, students will develop essential skills in data analytics, empowering them to harness the vast amounts of data generated by manufacturing and industrial operations. Through a combination of lectures, assignments, and hands-on projects, students will gain mastery over data mining, processing, analysis, visualization, and interpretation techniques, while learning to effectively utilize cutting-edge tools and technologies. By actively engaging with Python programming and realworld industrial applications, students will acquire practical experience in big data integration and processing. Throughout the course, students will develop a deep understanding of how to leverage data-driven insights to enhance products and services in industrial settings, equipping them with the knowledge and skills necessary to tackle complex data analytics challenges and drive innovation in their future careers.

Course Intended Learning Outcomes (CILOs)

CILOs		Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Understand basic concept of exploratory data analysis and its relationship to statistical learning, data mining, and potential applications	30	x		
2	Recognize and apply statistical methods for exploratory analysis in high-dimensional data	20	x	x	
3	Familiarize the principle of perception and be able to select suitable visualization techniques and methods for diverse types of datasets	20	x	x	
4	Demonstrate how exploratory data analytics and visualization can be applied to manufacturing and industrial problems	30	x	x	x

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Learning and Teaching Activities (LTAs)

LTAs	Brief Description	CILO No.	Hours/week (if applicable)	
1	Lectures	Formal lectures	1, 2, 3, 4	39 hours/semester
2	Final project	Group-based term project for students to apply the methods and techniques on a real-world problem.	1, 2, 3, 4	9 hours/semester
3	Laboratory work	Visualization tools and software package usage training	2, 3, 4	9 hours/semester

Assessment Tasks / Activities (ATs)

	ATs	CILO No.	Weighting (%)	Remarks ("- for nil entry)	Allow Use of GenAI?
1	Project	1, 2, 3, 4	15	-	Yes
2	Course assignments	2, 3, 4	15	-	Yes
3	Test	1, 2, 3	10	-	No

Continuous Assessment (%)

40

Examination (%)

60

Examination Duration (Hours)

Assessment Rubrics (AR)**Assessment Task**

Test

Criterion

Based on submitted written work to evaluate understanding of subject matter, evidence of knowledge base, capacity to analyse and synthesize, and evidence of original and critical thinking.

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Assessment Task

Course Assignment

Criterion

Based on submitted written work and lab attendance to evaluate understanding of subject matter, evidence of knowledge base, capacity to analyse and synthesize, and evidence of original and critical thinking.

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Assessment Task

Final Project

Criterion

Based on oral presentation and submitted written report to evaluate understanding of subject matter, evidence of knowledge base, capacity to analyse and synthesize, and evidence of original and critical thinking.

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-)

Moderate

Marginal (D)

Basic

Failure (F)

Not even reaching marginal levels

Part III Other Information

Keyword Syllabus

- Big data infrastructure; distributed file system; parallel processing; programming framework; cloud storage and computing; knowledge discovery; deep learning
- Software competency in data visualization software, Tableau, and the programming language Python
- Visualization of high-dimensional data, clustering and dimension reduction techniques
- Applications and case studies of data analysis, systems modelling, and optimization.
