SCM Faculty

- SCM boasts an international faculty of leading media artists and researchers and scholars who challenge the boundaries of their disciplines to create innovative works of media art and scholarship.
- The Center for Applied Computing and Interactive Media (ACIM) is a leading new media research center directed by Professor Jeffrey Shaw and features postgraduate as well as faculty fellows.
- SCM artists make socially engaged art, interactive digital installations, brain computer interfaces, computer art, animation, film and video, sound art, 3-D print art, and experimental games.
- SCM scientists work in the areas of human-computer interaction, graphic design, robotics, creative coding, and smart materials.
- Humanities social science faculty study the histories and cultures of the documentary and fiction film, curatorial practice, immersive media, and augmented cognition, the gamification of work, and the phenomenology and sociology of gaming.
